

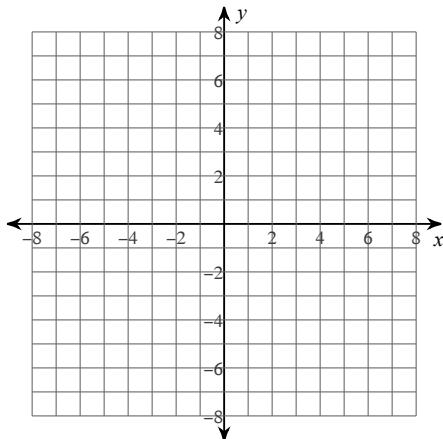

Graphing in Standard Form

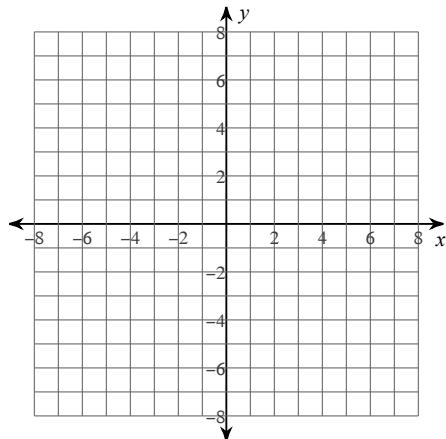

Date _____ Period ____

Identify the vertex, axis of symmetry, and min/max value of each. Then sketch the graph.

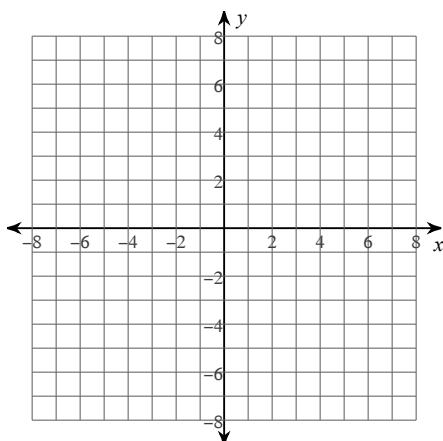

1) $f(x) = -x^2 + 2x - 7$

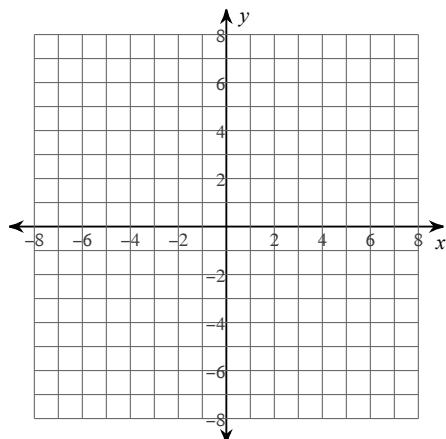

2) $f(x) = -x^2 + 2x + 1$

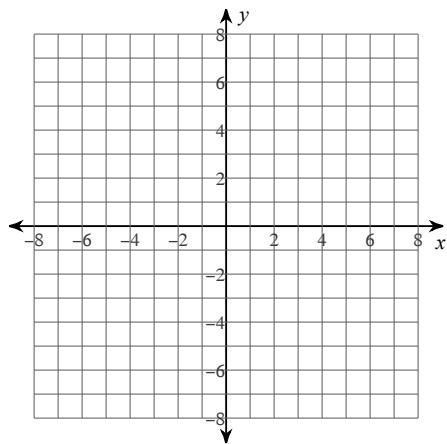

3) $f(x) = \frac{1}{4}x^2 + 3x + 6$

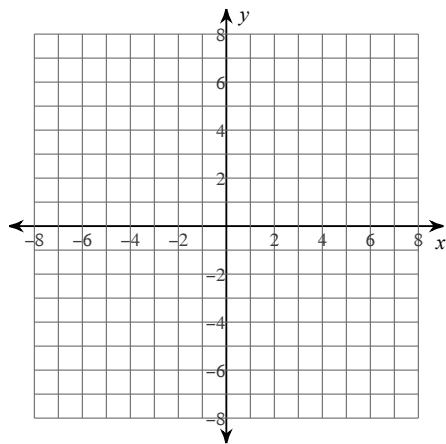

4) $f(x) = x^2 + 4x + 5$

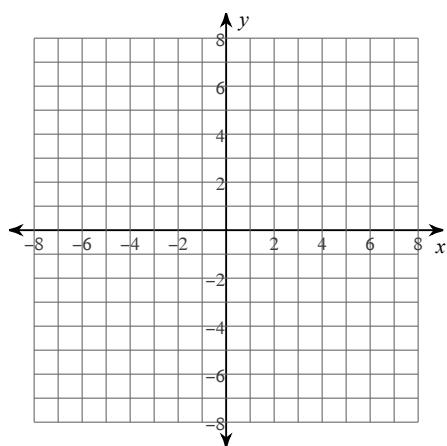

$$5) f(x) = x^2 + 4x + 2$$

$$6) f(x) = -x^2 - 2x + 1$$

$$7) f(x) = 2x^2 + 4x + 2$$

$$8) f(x) = -\frac{1}{2}x^2 - 2x - 6$$
